

IMPERVIA FLOORING THE BRAND YOU CAN TRUST TO BE WATERPROOF

THE BEST WATERPROOF RIGID LUXURY VINYL FLOORING - BETTER PRICES THAN AMTICO

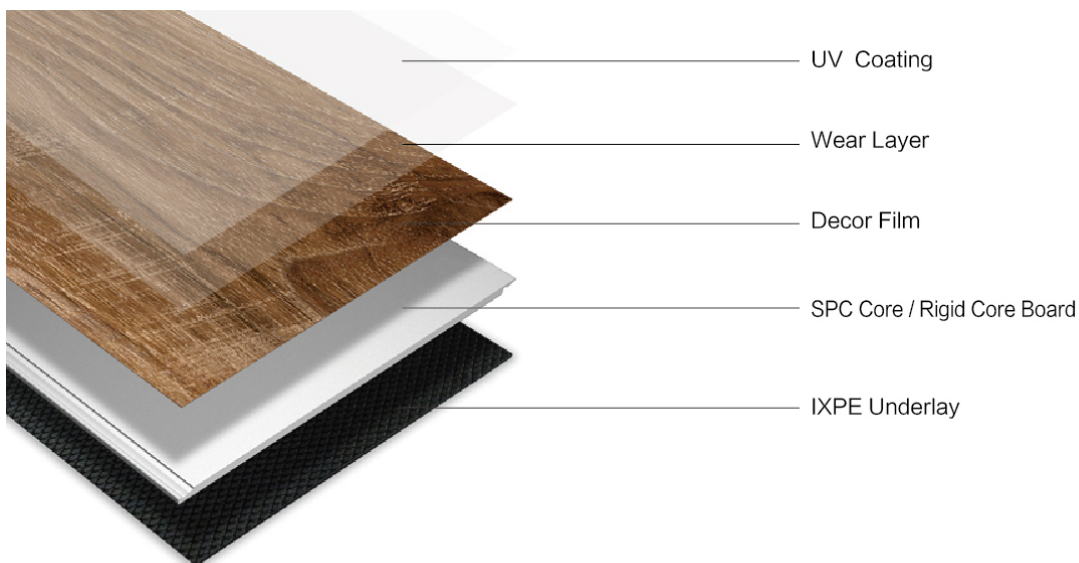

IMPERVIA Luxury Vinyl wood flooring is a simple push fit luxury vinyl floor and unlike a lot of the **AMTICO FLOORING** and **KARNDÉAN VINYL FLOORS** does **not need** any adhesive or underlay. This is because of our 1.5mm thick IXPE waterproof backing. We call it wood because it looks just like it with a **textured surface** and **natural look**.

The Valinge 5Gi push fit on our luxury vinyl wood planks and Valinge click system on our tiles mean a quick and easy cost-effective installation. The backing can be seen below

IMPERVIA luxury vinyl flooring is like real wood flooring with a wide long board, textured surface and natural look. The rigid core is made up of stone and fibre glass and has all the health and safety certificates to meet the most stringent of environmental requirements. Fit in Basements, Bathrooms, Kitchens or anywhere.

This backing has acoustic qualities as well as creating a warm soft feel to the textured surface of the floor. We have new machines to profile the latest 5Gi push fit system on our luxury vinyl floors and the rigid core has fibre as well, for total durability and stability. The image below explains the structure.

IMPERVIA Luxury Rigid Vinyl Tiles SPC Core.

These tiles, in our opinion are better **AMTICO AND KARNDIAN** as have our IXPE backing and click system which means no adhesives or underlay. We can create Marble and Stone tiles that are much lighter than the real thing and are 6.5mm thick. Rigid like stone with a simple click system it is the perfect do it yourself solution with a quick installation.
